

DSI Aerospace GmbH develops innovative hardware and software solutions and computer technologies for space applications. Our hardware and software are flying as part of prominent space programs such as ExoMars (Mars mission) and JUICE (Jupiter mission). Since 1997, our steadily-growing international team has been producing high-performance, customer-specific and dependable solutions.

We are looking for skilled and motivated colleagues who are passionate about solutions for the leading European satellite missions.

## Your tasks

- Technical Management of our international aerospace projects/ lead for technical meetings with customers
- Presentation of our technical solutions to the customer
- Technical management of the development team
- Requirements Engineering
- Electronic systems planning and specification
- Execution of System and Failure Analyses
- Monitoring of the technical implementation performed by our development team
- Monitoring of Test & Verification processes of our developed products

## Your qualification

- Degree in Computer Science, Computer Engineering, Electronics or in a comparable field
- Ideally 3-5 years of experience in the field of development of Electronic Systems for space flight applications
- Basic understanding of electronics and electronics circuits
- Participation in solving interdisciplinary challenges
- A structured, independent and responsible approach to work and a high level of quality awareness
- Ability to work under tight deadlines and to prioritize workload
- Flexibility and team skills
- High level of written English and at least basic fluency in spoken English
- Basic written and verbal communication skills in German would be beneficial

## What we offer

- Challenging and varied tasks encompassing all aspects of Systems Engineering
- Highly-interesting topics and application domains of our units in space
- Friendly and informal international team atmosphere
- Possibility of flexible and family-friendly working hours and central location with good transport links
- Competitive salary and up to +100% company contribution to corporate pension insurance
- Company-financed fitness club membership (wellpass or Hansefit)
- Jobrad (Bike-leasing, incl contribution by the DSI)

for a better space.
